Date: 28 June 2017  
Time: 10:00am EDT  
Location: online via WebEx

If the date and time are not ideal, save a seat by registering to ensure you receive access to the recording to view “on demand.”

Contact the Author Engagement team at [authors@ieee.org](mailto:authors@ieee.org) with any questions.

In today’s digital age, software is a crucial component of the scientific life cycle. Researchers develop algorithms, software simulations and analysis in different programming languages and in different versions. Access to code and algorithms are critical in solving the reproducibility crisis, advancing research discoveries and speeding up the pace of science.

This one-hour online training provides IEEE authors with an overview of the partnership IEEE has in place with Code Ocean—a cloud-based executable research platform that allows authors to upload, share and run their code.

This partnership allows readers of IEEE *Xplore* articles that contain associated code linked to the article the ability to execute the code in the cloud without any special hardware or setup. Authors who deposit their code gain a new “Code & Datasets” tab on the article home page in IEEE *Xplore* (see an [example](#)).

Spend an hour with us to learn more about how you can enhance your article. [Register today.](#)
