

Unleashing the Power of IEEE Collabratec™ and the AuthorLab

Register today.

Date: 8 November 2017
 Time: 1:00pm EDT
 Where: online (WebEx)

Registered participants will receive access to view “on demand.”

Email authors@ieee.org for answers to related questions or requests.

System Requirements:

PC: Intel Core2 Duo CPU 2.XX GHz or AMD processor. (2GB of RAM recommended). JavaScript and Cookies enabled. Active X enabled and unblocked for Microsoft Internet Explorer (recommended). Java 6.0 or later.

Mac: Intel processor (512 MB of RAM or more recommended). JavaScript and cookies enabled. Plug-ins enabled in Safari. Java 6.0 or later.

IEEE Collabratec, IEEE’s scholarly collaboration network, has over 100,000 individuals from across the globe collaborating on research projects, authoring efforts, and humanitarian activities. This network unites our community of professionals focused on IEEE’s technical areas for greater innovative opportunities.

This one-hour session focuses on the **IEEE AuthorLab**, a forum on Collabratec dedicated to journal publishing, and demonstrates how it can help you conduct your research and publish your findings.

Join Tiffany McKerahan, Author Engagement & Support Manager and IEEE AuthorLab moderator to learn how to:

1. Store, organize, and cite articles
2. Share and co-author documents with colleagues
3. Join the conversation

The IEEE AuthorLab is free and open to authors interested in and publishing in IEEE periodicals.
